Software Engineer- Distributed Systems

Qatar Computing Research Institute (QCRI) is seeking candidates for Software Engineer to work within the [Distributed Systems group](#). The Distributed Systems group at QCRI is currently focusing on three research areas: (i) next generation cloud infrastructures, (ii) distributed algorithms for massive data, and (iii) cloud applications and services.

Job Description:

- Software Engineers are expected to work in research teams, where they design, implement, and maintain software that is part of the research conducted by the team. Software Engineers may also be responsible for maintaining research infrastructure and running user-facing software services. They are expected to collaborate with researchers in developing research ideas and intellectual property in the form of disclosures and patent applications.
- Software Engineers are expected to contribute towards the research efforts of QCRI and to develop the necessary expertise to tackle the challenges of interest.

Requirements:

- BSc in computer science or a related field from a top-tier institution.
- MSc or PhD a plus.
- Strong record of major accomplishments.
- Strong communication and collaboration skills.
- Required technical skills:
 - Strong programming skills in C/C++ or Java.
 - Fluency in at least one scripting language (e.g., Python, Perl, or Ruby).
 - Expertise in Linux programming and administration.
 - Systems-level programming experience.
- Desirable technical skills:
 - Distributed systems experience.
 - Cluster management.
 - Experience with cloud technologies such as Amazon Web Services or OpenStack.
 - Experience with distributed programming models such as Hadoop or MPI.

Research at QCRI:

[QCRI](#) supports Qatar Foundation's mission by helping to build Qatar's innovation and technology capacity. It is focused on tackling large-scale computing challenges that address national priorities for growth and development. Moreover, QCRI is a national research institute conducting world-class applied computing research that transforms the way we interact with each other, enables new discoveries, and accelerates development of society.

A proud member of [Qatar Foundation for Education, Science and Community Development](#), QCRI is building a multidisciplinary research group in computer science with passion for innovation and excellence in research. The QCRI research program offers a collaborative, multidisciplinary team environment, endowed with a comprehensive support infrastructure.

Research in Qatar:

Qatar has made a commitment to be a leading center for research and development excellence and innovation. Home to a globally regarded scientific research funding organization, a world-class hub for technology innovation and commercialization, and prominent research institutes operating at the frontiers of science, Qatar Foundation Research and Development is spearheading a national endeavor to fulfill this commitment.

The country is home to branch campuses of numerous world-renowned universities such as Carnegie Mellon University, Texas A&M University and Georgetown University, major oil and gas companies, telecommunication companies, and international media organizations such as Al Jazeera. These local institutions offer opportunities for research collaboration to tackle new computing research challenges of practical importance.

Package:

QCRI offers a unique opportunity for strong research careers and a highly competitive compensation package including attractive tax-free salary and additional benefits such as furnished accommodation, excellent medical insurance, annual paid leave, and more.
