## **Postdoctoral Researchers- Social Computing**

We invite applications of researchers to join the [Social Computing](#) group at Qatar Computing Research Institute as post-doctoral researchers. The [focus areas](#) of the Social Computing group are: (1) mining social media for socio-political, cultural, and behavioral patterns, (2) social media intelligence for news and (3) extracting timely and credible information from social media for crisis response.

### **Job Description:**

- Your work will be primarily with one of our scientists with a focus on one particular area of research. Please indicate in your application with which scientist you would prefer to work.
- Your work will contribute towards publications in top tier conferences and journals, for a list of target venues see our [recent publications](#) page.
- Your work may also contribute to research prototypes and/or intellectual property in the form of disclosures and patent applications.

### **Requirements:**

- Postdoctoral Researcher (1 year, renewable):
  - PhD in computer science or a related field from a top-tier institution.
  - Strong record of major accomplishments and publications.
  - Strong communication skills: must be fluent in English.
  - Strong collaboration skills: must be willing to work with an international team of scientists from very diverse backgrounds.

### **Research at QCRI:**

[QCRI](#) supports Qatar Foundation's mission by helping to build Qatar's innovation and technology capacity. It is focused on tackling large-scale computing challenges that address national priorities for growth and development. Moreover, QCRI is a national research institute conducting world-class applied computing research that transforms the way we interact with each other, enables new discoveries, and accelerates development of society.

A proud member of [Qatar Foundation for Education, Science and Community Development](#), QCRI is building a multidisciplinary research group in computer science with passion for innovation and excellence in research. The QCRI research program offers a collaborative, multidisciplinary team environment, endowed with a comprehensive support infrastructure.

### **Research in Qatar:**

Qatar has made a commitment to be a leading center for research and development excellence and innovation. Home to a globally regarded scientific research funding organization, a world-class hub

for technology innovation and commercialization, and prominent research institutes operating at the frontiers of science, Qatar Foundation Research and Development is spearheading a national endeavor to fulfill this commitment.

The country is home to branch campuses of numerous world-renowned universities such as Carnegie Mellon University, Texas A&M University and Georgetown University, major oil and gas companies, telecommunication companies, and international media organizations such as Al Jazeera. These local institutions offer opportunities for research collaboration to tackle new computing research challenges of practical importance.

**Package:**

*QCRI offers a unique opportunity for strong research careers and a highly competitive compensation package including attractive tax-free salary and additional benefits such as furnished accommodation, excellent medical insurance, annual paid leave, and more.*
