

Project Title

Supporting the Rayyan Community

Project Description:

Rayyan (rayyan.qcri.org) is a very successful project within the Data Analytics serving more than 3000 users worldwide and growing. These are doctors, faculty, graduate student, librarians, and government employees from various institutions including top universities and medical centers. Rayyan's mission is to provide an end-to-end web and mobile platform for systematic review authors. Systematic reviews are the pinnacle of evidence-based medicine and are the reference when it comes to know and what does not work. They're also being used in other areas.

The goal of this project is to propose and implement a web platform where the Rayyan community can communicate, share ideas, and discuss topics on interest.

Duties/Activities:

- Understanding the functioning of Rayyan
- Take a brief tutorial on systematic reviews
- Study current platforms where people interested in systematic reviews interact
- Propose a design for a possible collaboration platform
- Design and implement a web forum for Rayyan's users

Required Skills:

- Web development
- Versatility in studying and selecting web tools, especially those open source

Learning Opportunities:

- Opportunity to interact with a vibrant research group
- Build a resource that will be accessed by thousands of users

Expected Team Size: 1
