

## Project Title

### Revamping the Data Analytics Web Site

#### Project Description:

The Data Analytics group at QCRI has been very active in different research themes. The group has consistently published in the top database conferences since its inception and has built several systems. However, its current web presence (da.qcri.org) is not in par with these achievements.

The goal of this project is to design and implement a Web site for the group that better reflect its activities. The Web site should be easy to maintain and update.

#### Duties/Activities:

- Come up with a design for the web site
- Explore different technologies for the implementation
- Define and execute an implementation plan

#### Required Skills:

- Photoshop
- HTML 5
- CSS 3

#### Learning Opportunities:

- Opportunity to interact with a vibrant research group
- Build a web site that can be accessed by thousands of visitors

**Expected Team Size:** *it is preferable to have team projects*

1
